■ Application Circuit Example

■ Usage Notes

1. External heatsink is needed when used. External heatsink should be fixed to the chassis.
2. Fin of the IC can be connected to GND.
3. Please prevent output to V<sub>CC</sub> short and output to GND short.
4. Load short protection will only prevent the IC from damaging if operating V<sub>CC</sub> < 30 V
5. The temperature protection circuit will operate at T<sub>j</sub> around 150 °C.

However, if temperature decrease, the protection circuit will automatically be deactivated and resume normal operation.
